

5th Grade Weekly Assignments

May 29 - June 4

Math: We are continuing with Geometry -- working on shapes with 4 sides and 4 angles. Complete the packet and choice board on quadrilaterals.

SCIENCE: This is your task this week... sit, observe, ask questions. These 3 activities are the heart of all science. In your science packet the first page is the directions and the second page is what should be completed and returned to your teacher.

READING/SOCIAL STUDIES: This week we are continuing with The Thirteen Colonies. There are two readings on the New England Colonies.

You will need to:

- take Three Column Notes on the 9 vocabulary words
- write about The Main Ideas
- write a journal or diary entry

Please start your new June Reading Calendar as you finish off the May Reading Calendar this weekend.

REMINDER: You can find all the needed resources on your teacher's classroom website. May Reading Log, Library Book Checkout Request, May Math Facts Challenge Fluency Chart, Links to all Videos, PDF's, and Past Assignments. If there is something you can't find, contact your teacher, and she or he will get it to you!
